Who we are...

Our highly skilled product and sales managers take into consideration the specialization, staff suggestions and budgets of each hospital. Our marketing, engineering, sales, logistic departments and customer service are doing the best to SATISFY YOUR NEEDS – this is OUR AIM and PLEASURE. Being an innovative and customer oriented company, Rumex International is always open to new ideas – if your surgical technique (or preference) requires a special instrument – we will create it for you.

Data Matrix Barcodes

We take pride in being the first manufacturer around the world to start applying barcodes on ophthalmic instruments!

- Machine readability of barcodes
- Controllable sterilization
- Accounting
- Inventory management
- Transparent costs
- Enhanced patient safety
- Quality Control
- Easy ordering
- Information exchange

Rumex International is always open to new ideas – if your surgical technique (or preference) requires a special instrument – we will create it for you!
OEM / Private branding line

Rumex International Co. manufactures surgical instruments for other well known brands. Please feel free to contact us if you are interested in OEM business.
WEBSTORE

Rumex International Co. operates a retail webstore available 24/7 in all the countries across the world. We are consistently working on its improvement. Technical Support is available online now. We are improving educational issues and creating the KOL section with videos and articles on surgical manipulations.

Our webstore is by no means a barrier to reinforcing the relationships with distributors. On the contrary, our distributors section allows to make bulk orders and get invoices instantly. However only authorized distributors are allowed to see wholesale prices. Since 2013, we have been elaborating on the distributors portal which will allow us to provide customized approach to all industry clients.
Thank you!
